Subject: Australia's Energy Ministers are seeking feedback on the design of a new national Orderly Exit Management (OEM) Framework, to support energy reliability as ageing coal-fired power stations leave the system.

Follow Up Flag: Follow up
Flag Status: Completed

I absolutely object to the exit of reliable, affordable, efficient, naturally plentiful, secure, 24/7 Australian benefiting Coal leaving the Electricity System as there is NO present equivalent replacement & never will be until Clean, Safe Nuclear Power is up & running in Australia.

The PATHETIC. weather dependent RenewaBULL Solar/Wind Energy Poverty Grift & Ponzi Scheme/Scam has a 30% Capacity Factor - Even less for Solar & BESS are incapable, Fire inferno, life threatening junk!

Nobody in their right mind wants 100,000 GEELONG sized Big Toxic Battery PUBLIC HEALTH & SAFETY RISKS stupidly & unconscionably littering the landscape!!

Australia's Energy Ministers are in Cloud Cuckoo Land - weakening Australia with CCP Slave Labour Junk & torturing the people SO unjustly with Government inflicted Skyrocketing Electricity Prices = Cost of Living Crisis!

Without Coal & Nuclear Power there will be no energy reliability at all as ageing coal-fired power stations leave the system.

People will die because of this!

AEMO are a completely untrustworthy, politicised body with NO scientific rigour, NO Engineering Facts, NO Integrity & NO Ethics.

Their Brazen Deception & Sunk Cost Trickery reliance is outrageous!!

It's not one big 'DOABLE' as NSW Climate Change and Energy Minister Penny Sharpe claims!

We need an Immediate Moratorium, Independent Federal Inquiry & a Royal Commission into the Fake Green Swindle before Australia's FOOD SECURITY, ENERGY SECURITY, ECONOMIC PROSPERITY & NATIONAL SECURITY is all sabotaged by the Fake Green Global Agenda & RenewaBULL Zealots!

 STOP  THE RENEWABULL TRANSITION TO EXTINCTION!
