## Australian Petroleum Statistics

### Notes

#### About the Australian Petroleum Statistics

- The Australian Petroleum Statistics (APS) is a monthly publication which provides statistics on petroleum production, refinery inputs and outputs, sales of petroleum products, stocks of petroleum products, and prices. The primary sources for these statistics are voluntary submissions from participating companies, supplemented by administrative data sources and estimates. Trade statistics are sourced from the Australian Bureau of Statistics.
- From 27 September 2016, the energy statistics function, including responsibility for the Australian Petroleum Statistics, transferred to the Department of the Environment and Energy. Our email address is petroleum.statistics@environment.gov.au

(a) Includes reporting companies' own use, but excludes refinery fuel. (b) This is a minimum level and includes only direct sales by the oil industry. The data does not include volumes sold to distributors etc. which are subsequently used or sold for automotive use. (c) Includes petrochemical transfers to industry. (d) Includes automotive diesel oil and industrial & marine diesel fuel.

Notes:

Totals may not add due to rounding.

Refined products may be local or imported.

Latest month percentage change from equivalent month of previous year.	4.4%	7.9%	-13.6%	-2.4%	2.8%	17.8%	-34.1%	18.6%	34.1%	1.8%	-3.1%

(a) Includes stocks held by petroleum producers and at refineries and seaboard bulk storage terminals by major oil companies and some large consumers. (b) Expressed in Crude Oil Equivalent (COE) terms; that is, 1 tonne of product = 1.065 tonnes of COE. (c) Average levels for the fiscal year. (d) Includes automotive diesel oil and industrial & marine diesel fuel. (e) International Energy Agency (IEA) days of net imports coverage is calculated based on the IEA total emergency reserves and net imports methodology of the IEA International Energy Program (IEP). The net imports calculation is rebased in the reporting month of April of each year.

**Notes:**

Australian prices are weighted based on state volumetric sales and the average retail price in each of the capital cities during the quarter and include all taxes.

All prices are nominal and have not been adjusted for inflation.

### Notes:

Australian prices are weighted based on state volumetric sales and the average retail price in each of the capital cities during the quarter.

International prices are converted from local currency to Australian dollars using the average daily interbank rate for the quarter (midpoint price) sourced from www.oanda.com.

All available country data are shown in the tables. If a country does not appear under a particular fuel type then no data has been provided by that country for that fuel.

Premium unleaded petrol prices are for 95 RON in all cases except New Zealand, which is for 96 RON.

RON grades for premium unleaded gasolines should be taken as indicative only. The specifications for the rating systems used vary by reporting country.

Average OECD prices are the simple average and are not weighted.
