Australian Petroleum Statistics

Notes

About the Australian Petroleum Statistics

- The Australian Petroleum Statistics (APS) is a monthly publication which provides statistics on petroleum production, refinery inputs and outputs, sales of petroleum products, stocks of petroleum products, and prices. The primary sources for these statistics are voluntary submissions from participating companies, supplemented by administrative data sources and estimates. Trade statistics are sourced from the Australian Bureau of Statistics.
- The petroleum sales data contained in Tables 3A to 3F are currently being reviewed. These tables currently do not represent full coverage of sales across all products, and work is underway to improve this coverage. This includes through analysis of excise data from the Australian Taxation Office (ATO) and improved estimation techniques. Users are advised to exercise caution around using the sales data.
- Monthly natural gas production data in Table 1A are also under review to improve coverage. More complete quarterly and annual estimates of natural gas production are available in the *Resources and Energy Quarterly* and the *Australian Energy Statistics*.
- From 27 September 2016, the energy statistics function, including responsibility for the Australian Petroleum Statistics, will transfer to the Department of the Environment and Energy. Feedback after that date can be provided to petroleum.statistics@environment.gov.au

Revisions in this issue

- Unit conversion factors for LNG exports had been incorrectly applied to historical data in Table 5. This has now been rectified which has resulted in a revision to these estimates.
- Minor adjustments to lubricant data in June were incorporated this month which have also affected the annual and quarterly lubricant tables 3CC and 3E.

Table 1A. Petroleum production, Australia

(a) Includes reporting companies' own use, but excludes refinery fuel. (b) This is a minimum level and includes only direct sales by the oil industry. The data does not include volumes sold to distributors etc. which are subsequently used or sold for automotive use. (c) Includes automotive diesel oil and industrial & marine diesel fuel. # Includes petrochemical transfers to industry.

Notes:

Totals may not add due to rounding.

Refined products may be local or imported.

(a) Includes A.C.T. (c) Includes automotive diesel oil and industrial & marine diesel fuel. (nei) Not elsewhere included.

* Small amounts of ethanol-blended fuel are sold in South Australia, Western Australia, Tasmania and Northern Territory although full details are not available. The volume sold in these states/territory has been excluded from this table and, as a result, the national total for ethanol-blended fuel may not match exactly with the total in table 3A.

n.p. Not published. These volumes are included in state and national totals.

0.0 denotes less than 0.05 megalitres. (a) There may be temporal differences between the reported ABS monthly trade data and the actual receipts of petroleum products by refineries and independent importers. (b) Natural gas imports originating from International Waters are exclusively from the Bayu-Undan field, located in the Joint Petroleum Development Area which is jointly managed by Australia and Timor-Leste, and represents the total production of natural gas from that field. (c) including country details which are confidential. (d) Includes automotive diesel oil and industrial & marine diesel fuel.

0.0 denotes less than 0.05 megalitres. (a) LNG export volumes have been made available by the ABS from July 2015. (b) Estimate provided by ABS. (c) Includes automotive diesel oil and industrial & marine diesel fuel.

Source: Australian Bureau of Statistics

Please note: In previous editions, unit conversion factors had been incorrectly applied to the LNG exports data in column C. This has now been rectified which has resulted in a revision to these estimates.

July 2016
