

### Correction

The Independent Review into the Future Security of the National Electricity Market Preliminary Report, on page 8 stated that:

“... household energy bills increased 61 per cent on average between 2008 and 2014, mainly on the back of network investments. This is compared to a 14 per cent increase in the consumer price index over the same period.”

This should have read:

“... household *electricity* bills increased 61 per cent between 2008-09 and 2012-13<sup>1</sup>, mainly on the back of network investments. This is compared to a 10.4 per cent increase in the consumer price index over the same period<sup>2</sup>.”
