Table 8C	Comparison of automotive LPG prices in OECD countries
Table 9	ABS Merchandise Trade: Confidential Commodities Restrictions

\* Tables 3B to 3F are currently under review.

## Australian Petroleum Statistics

### Notes

#### About the Australian Petroleum Statistics

- The Australian Petroleum Statistics (APS) is a monthly publication which provides statistics on petroleum production, refinery inputs and outputs, sales of petroleum products, stocks of petroleum products, and prices. The primary sources for these statistics are voluntary submissions from participating companies, supplemented by administrative data sources and estimates.

#### Revisions in this issue

- LNG export volumes are now included in Tables 5 and 5A. The Australian Bureau of Statistics (ABS) has made LNG export volumes available from July 2015. Export volumes to individual countries and total volumes prior to July 2015 remain confidential. Quarterly and annual estimates of LNG export volumes prior to July 2015 are available in the *Resources and Energy Quarterly* and the *Australian Energy Statistics*.
- Natural gas and LNG trade volumes and values have been disaggregated from total refined petroleum products in Tables 4, 4A, 4B, 4BB, 5, 5A, 5B and 5BB.
- The petroleum sales data contained in Tables 3A to 3F are currently being reviewed. These tables currently do not represent full coverage of sales across all products, and work is underway to improve this coverage. This includes through analysis of excise from the Australian Taxation Office (ATO) and improved estimation techniques. Users are advised to exercise caution around using the sales data.
- In response to requests from users, state sales for the three largest products, automotive gasoline, aviation turbine fuel and diesel oil, are now available in Tables 3B and 3C. State sales for other products have been aggregated while the sales data are reviewed. We apologise for any inconvenience and we aim to make these data available as soon as possible.
- Monthly natural gas production data in Table 1A are also under review to improve coverage. Quarterly and annual estimates of natural gas production are available in the *Resources and Energy Quarterly* and the *Australian Energy Statistics*.

(a) Includes reporting companies' own use, but excludes refinery fuel. (b) This is a minimum level and includes only direct sales by the oil industry. The data does not include volumes sold to distributors etc. which are subsequently used or sold for automotive use. (c) Includes automotive diesel oil and industrial & marine diesel fuel. # Includes petrochemical transfers to industry.

Notes:

Totals may not add due to rounding.

Refined products may be local or imported.

(a) Includes A.C.T. (c) Includes automotive diesel oil and industrial & marine diesel fuel. (nei) Not elsewhere included.

\* Small amounts of ethanol-blended fuel are sold in South Australia, Western Australia, Tasmania and Northern Territory although full details are not available. The volume sold in these states/territory has been excluded from this table and, as a result, some national totals may not match exactly with the totals in table 3A.

n.p. Not published. These volumes are included in state and national totals.

(a) Includes A.C.T. (c) Includes automotive diesel oil and industrial & marine diesel fuel. (nei) Not elsewhere included.

\* Small amounts of ethanol-blended fuel are sold in South Australia, Western Australia, Tasmania and Northern Territory although full details are not available. The volume sold in these states/territory has been excluded from this table and, as a result, some national totals may not match exactly with the totals in table 3A.

n.p. Not published. These volumes are included in state and national totals.

0.0 denotes less than 0.05 megalitres. (a) There may be temporal differences between the reported ABS monthly trade data and the actual receipts of petroleum products by refineries and independent importers. (b) Natural gas imports originating from International Waters are exclusively from the Bayu-Undan field, located in the Joint Petroleum Development Area which is jointly managed by Australia and Timor-Leste, and represents the total production of natural gas from that field. (c) Includes automotive diesel oil and industrial & marine diesel fuel.

0.0 denotes less than 0.05 megalitres. (a) There may be temporal differences between the reported ABS monthly trade data and the actual receipts of petroleum products by refineries and independent importers. (b) Natural gas imports values have been confidential since December 2013. (c) including country details which are confidential. (d) Includes automotive diesel oil and industrial & marine diesel fuel.

(a) Includes stocks held by petroleum producers and at refineries and seaboard bulk storage terminals by major oil companies and some large consumers. (b) Expressed in Crude Oil Equivalent (COE) terms; that is, 1 tonne of product = 1.065 tonnes of COE. (c) Average levels for the fiscal year. (d) Includes automotive diesel oil and industrial & marine diesel fuel.

(a) Includes stocks held by petroleum producers and at refineries and seaboard bulk storage terminals by major oil companies and some large consumers. (b) Expressed in Crude Oil Equivalent (COE) terms; that is, 1 tonne of product = 1.065 tonnes of COE. (c) Average levels for the fiscal year. (d) Includes automotive diesel oil and industrial & marine diesel fuel. (e) International Energy Agency (IEA) days of net imports coverage is calculated based on the IEA total emergency reserves and net imports methodology of the IEA International Energy Program (IEP). The net imports calculation is rebased in the reporting month of April of each year.
